niclagr.github.io • [Behance](#) • [GitHub](#) • [LinkedIn](#)

Product designer with frontend engineering depth, designing and shipping products from research and prototyping through production.

EDUCATION

Northeastern University (Dean's List)

Boston, MA

BS Computer Science & Design, Minor in History • GPA: 3.6 • Expected Dec 2026

EXPERIENCE

Frontend Developer & UX Designer

Boston, MA

GE Aerospace — Aerospace Carbon Solutions • Jan 2026 – Aug 2026

- Designed the UX for an enterprise weather platform supporting 63 variables, including a two-tier layer system, Compare mode, and interactive wind visualization.
- Ran 12 usability sessions with scientists and aviation partners, uncovering a wind-display error before release and shaping an airline demo mode.
- Led SIGNPOST UX from Figma through production, shipping 10 features in Vue 3 and leading a 40+ file frontend refactor with zero regressions.

Platform Support Engineer

Remote, Part-time

Tulip Interfaces • Jul 2025 – Jan 2026

- Supported 10+ product areas while identifying recurring UX friction across 30+ Community threads; reduced resolution time by ~40%.

UX Engineer Co-op

Somerville, MA

Tulip Interfaces • Jan 2025 – Jun 2025

- Designed and built Mission Control 3.0 from Figma through React production, now permanently installed at Tulip's headquarters.
- Designed and built 15+ interactive manufacturing demos spanning machine vision, pick-to-light, and industrial HMI systems.
- Adapted demos and floor experiences around customer use cases for 1,000+ visitors across major industry events and executive tours.

FEATURED PROJECTS

Nurture Nest: Maternal Mental Health for Rural Ghana

React Native, Figma • Innovators for Global Health • 2025 – 2026

- Designed a maternal mental-health app with Ghana's Dwenase Health Centre, using field research and feedback from five midwives and a doctor to improve onboarding, symptom tracking, and clinical screenings.
- Presented at Northeastern's RISE expo and funded through a PEAK Experience Award.

Jewelry Store CRM & Repair Tracker

Next.js, React 19, TypeScript, Tailwind, Prisma

- Designed and built an iPad-first repair management system replacing a jewelry store's paper workflow with repair tracking, customer management, role-based access, and automated status texts.
- Iterated the intake experience through on-site testing and owner feedback; now runs the store's daily repair pipeline.

New Vegas Web Monitor: Dual-Screen Gaming Companion

Vue 3, Vite, Capacitor, C++ Plugin (NVSE)

- Designed and built a cross-platform second-screen companion app for Fallout: New Vegas, from Figma prototypes through production.
- Improved touchscreen map interactions after physical-device testing exposed gesture conflicts not visible during prototyping.

Additional: Interactive Portfolio (Figma, Three.js, React) • Unity game development • Graphic design & branding

TECHNICAL SKILLS

Design & Research: Product design, UX/UI, user research, usability testing, wireframing, prototyping, information architecture, design systems, accessibility

Design Tools: Figma, Illustrator, Photoshop, InDesign

Frontend: Vue 3, React 19, React Native, JavaScript/TypeScript, Tailwind CSS, Framer Motion, Vite, HTML/CSS, Three.js, CesiumJS

Additional: Python, Node.js/Express, SQL, REST APIs, Docker, Git/GitHub

INTERESTS & ACTIVITIES

UI design • Game development • Backpacking • Sustainability • Humanitarian tech
