EDUCATION

Northeastern University (Dean's List) | **Khoury College of Computer Science** | Boston, MA | Expected Dec 2026

BS Computer Science & Interaction Design, Minor in History | GPA: 3.6

TECHNICAL SKILLS

- **Frontend & UX:** HTML, CSS, JavaScript, TypeScript, React, Tailwind CSS, Framer Motion, Vite, UI/UX design, prototyping, wireframing, usability testing, accessibility, data visualization
- **Design Tools:** Figma, Illustrator, Photoshop, InDesign
- **Programming & AI Tools:** C#, Java, Python, Kotlin, R, SQL, OpenAI APIs, GitHub Copilot, Cursor, agentic AI workflows,
- **Backend & Databases:** Node.js, Express, Redshift, Snowflake
- **APIs & Integrations:** REST APIs, Tulip Connectors, MQTT, OPC-UA
- **Cloud & DevOps:** Docker, Kubernetes, Helm, Argo CD, AWS (ECR, CloudWatch), GitHub Actions, Vault, TLS/cert-manager
- **Industrial/IoT:** Sensors, pick-to-lights, cameras, automation rigs, custom demo rigging
- **Fabrication & Prototyping:** 3D Printing, Soldering, Drill Press, Band Saws, Table Saws, Miter Saws
- **Collaboration & Version Control:** GitHub, GitLab, Jira

EXPERIENCE

GE Aerospace — Frontend Developer & UX Design Co-op | Boston, MA | January 2026–Present

- Developing a scenario exploration web application to support **data-driven decision-making** using **Vue 3** and **TypeScript**
- Translating **Figma designs & prototypes** into **production-ready UI**, consistently delivering new features **each sprint**
- Working directly with a **product manager** and UK-based **engineering team** to align **UX decisions** with technical constraints
- **Leading** numerous **demo** sessions with **customers** and **stakeholders**, gathering feedback and **iterating** quickly on product features
- Contributing to **API** integration and occasional **full-stack** work to support real-time data flows
- Built a real-time 3D geospatial visualization app using Vue 3 and CesiumJS with live weather, flight, and risk data integrations, owning end-to-end UX and frontend in collaboration with engineers and domain scientists within a week-long hackathon

Tulip Interfaces — Product Support Engineer (Part-Time) | Boston, MA | July 2025–January 2026

- Delivered technical support across **10+ domains**, translating complex issues into clear solutions that improved customer experience for **15–20 users weekly**
- Triage and resolve critical issues by debugging **distributed systems**, reducing resolution times by **40%**
- Built **automation tools** and contributed to **LibreChat AI documentation**, saving **10+ hours monthly** via streamlined workflows
- Authored **20+ public-facing KB articles** and Community posts
- Supported **complex TEC demo issues**, enabling **5+ executive tours**

Tulip Interfaces — TEC Hardware/Software Engineer Co-op | Boston, MA | Jan 2025–Jun 2025

- Led design and development of **Mission Control 3.0**, a **React-based app** built to complement TEC tours with **interactive, real-time visualizations**, creating a more personal and engaging visitor experience compared to Mission Control 2.0
- Piloted **Cursor-driven development** to prototype and accelerate Mission Control 3.0 builds, cutting iteration time significantly
- Built apps for the Tulip Experience Center, applying UX/UI to balance operator workflows with visitor experience for 200+ guests/executives
- Conducted **UX analysis and interface optimization** for **TEC 2.0 redesign**, securing CEO approval by improving layout clarity, navigation flow, and interactive storytelling
- Built **custom JavaScript widgets** and **KPI components** to improve **data accessibility, visualization clarity, and workflow usability** in live factory scenarios
- Developed **Node-RED flows** and **Tulip connectors**, and trained **LandingAI models**, enabling connectivity with bio/pharma equipment, pick-to-lights, and automated visual guidance systems
- Built and supported **15+ TEC demos** for executive tours and global tradeshow (IMTS, Pharma MES USA, Automate, Honeywell World Tour), ensuring apps and hardware felt **intuitive, polished, and engaging** for **1,000+ professionals**

- Delivered exclusive **UX/engineering support** for **World Economic Forum factory demos** and **TEC CEO/CTO tours**, tailoring interactive experiences to high-profile audiences
- Deployed to **Garden 11 Kubernetes** via **Helm & Argo CD**; implemented **GitHub Actions CI/CD pipelines** to reduce deployment time **60%**, and consolidated system management (**Vault secrets, TLS, probes, CloudWatch**) with **99.5% uptime**

Northeastern University — IT Specialist (MIE Dept.) | Boston, MA | Sep 2024–Dec 2024

- Maintained computing infrastructure and provided **hardware/software troubleshooting** for **50+** faculty and graduate students

Kinnaly Labs — Algorithm Developer Intern | UC Davis | Feb 2024–May 2024

- Developed **algorithms** to organize **biobehavioral aging data** and extract **statistical patterns**, improving analysis throughput by **3x**

PROJECTS

Jewelry/Retail Management Platform | 08/2025–01/2026

- Leading **UX design** and **wireframing** in Figma, defining user flows and interface layouts to streamline repair tracking and customer interactions
- CRM with **repair workflow tracking**, SMS/email alerts, and QR/barcode receipts
- Building with **React, Node.js/Express, REST APIs, SQL database**

Portfolio Website | 2025

- Designed and developed an **accessibility-first interface** highlighting projects and creative work
- Focused on **UX** with smooth animations, responsive layouts, intuitive navigation (**React 18, Framer Motion, Tailwind CSS**)
- Iteratively tested **usability** with peers, refining information hierarchy and **interaction design**
- Ensured accessibility and **performance best practices**; site evaluated with high Lighthouse scores
- Optimized build pipeline and deployed via **GitHub Pages**, **reducing page load time** by **40%**
- Leveraged **Cursor & AI tools** to prototype and build **~70% faster** than typical timelines

Nurture Nest — Maternal Health App | 2025

- Collaborated on **UX design** in **Figma** and **front-end development** to deliver a **mobile-first maternal health application**
- Designed intuitive flows for health tracking, alerts, and educational resources tailored to rural communities
- Helped streamline access to **maternal health resources**, supporting community efforts to increase **awareness** and **reduce care barriers**

Game Development | 2024

- Built multiple **Unity 3D** projects, including *Whispers of the Abyss* (dungeon-horror) and *Hellfire at High Noon* (FPS), implementing **custom mechanics for combat, enemy AI, and level design**
- Designed interactive environments and gameplay loops, focusing on balance, progression, and immersive player experience
- Recreated the *NYT Spelling Bee* and *Red7* in **Java**, applying **object-oriented programming** and **data structures** to replicate scoring logic, rules enforcement, and UI interactions
- **Iteratively tested** games with peers to refine usability, playability, and engagement

LOCK-IN Prototype & Branding | 2024

- Designed **logo**, brand **identity**, and interactive **Figma** prototype for LOCK-IN
- Helped pitch and define visual direction for concept pitched to **50+ peers and mentors**, placing **third overall** in startup challenge
- Built high-fidelity **mockups** and clickable **flows** to test interactions and visual consistency
- Conducted **usability testing** with peers, **iterating** on feedback to refine layout, improve navigation clarity, and enhance overall user experience

Give a Hand Club Poster | 2024

- Created promotional poster, applying hierarchy and typography choices that improved message readability
- Incorporated audience feedback and delivered 2 revised versions, increasing reported clarity and engagement during event promotion surveys

Additional Design Work | 2024

- Produced posters, logos, and branding for various clients and clubs (e.g., *Black Swan* redesign, jewelry business branding, Poodle Pack!)
- Iteratively refined designs through **10+** client feedback sessions, ensuring final deliverables aligned with user needs and improved visual impact

ACTIVITIES & INTERESTS

- **UX Developer** — Innovators for Global Health (Humanitarian Technology)

- Tennis, lifting, camping, backpacking, pc & keyboard building, graphic & UX design, hardware & game modding
-
